## Description

This enhanced PageControl saves the values of all the embedded edit controls to the registry, making it the ideal component for those *Preferences* and *Options* forms. Right now, the embedded control properties that are saved into the registry are:

- ◆ TEdit.Text
- ◆ TMaskEdit.Text
- ◆ TCheckBox.Checked
- ◆ TComboBox.Text
- ◆ TRadioGroup.ItemIndex
- ◆ TTrackBar.Position
- ◆ TSpinEdit.Value
- ◆ TDateTimePicker.Date

Controls embedded in TPanel and TGroupBox controls are also saved.

## Properties

TRegPageControl inherits all properties from TPageControl, and has the following new properties.

Property	Type	Purpose
RegRoot	String	Registry Root Key in which all property values will be written. Typically <code>\Software\MyCompany\Product</code>

## Methods

TRegPageControl inherits all Methods from TPageControl, and has the following new methods

Procedure ReadProperties;	
Purpose	Read values of ALL embedded properties from Registry.
